Risk Assessment

Risk Assessment is a solution of the Bosch Elevator Cloud – the service platform for smooth elevator operation.

Our employees carry out the risk identification and a specialist in occupational safety summarises the results in a risk assessment. This documentation includes a list of potential hazards and measures and deadlines to remedy any deficiencies.

Procedure

Evaluation of elevator cars and the surrounding area (including engine rooms)

Assessment of data recorded taking into account applicable specifications and state of the art

Preparation of comprehensive documentation including risk assessment and actions to be taken

Compliance with legal requirements

The detailed documentation demonstrates compliance with the Operational Safety Ordinance (BetrSichV) and the TRBS 1111

Specialist knowledge

Our employees and partners have gained expertise on occupational safety and elevators

Completeness

You will receive a complete overview of all relevant aspects of the local conditions and necessary measures
