Visual Inspection

Risk Assessment

Visual Inspection is a solution of the Bosch Elevator Cloud – the service platform for smooth elevator operation.

With its qualified associates, Bosch ensures reliable compliance with operator obligations. Bosch carries out regular visual inspections and functional checks of your elevators. You can easily adjust the frequency of the inspections to your local conditions.

Procedure

Individual & flexible inspection based on the use

Proactive feedback on the condition of the installation

Complete documentation of the inspection

Regular inspection is an operator obligation

Elevator installations shall be subject to regular inspection and performance checks in accordance with point 4.6 of Annex 1 in conjunction with the third sentence of paragraph 5 of paragraph 4 BetrSichV (Extract from TRBS 3121, Chapter 3, paragraph (4))

We will help you to carry out your duties.
